

RKJB AD 2.1 AERODROME LOCATION INDICATOR AND NAME

RKJB - MUAN / Muan International

RKJB AD 2.2 AERODROME GEOGRAPHICAL AND ADMINISTRATIVE DATA

1	ARP coordinates and site at AD	345929N 1262258E 180° / 1 402 m from THR 19
2	Direction and distance from city	254°, 46 km from GwangJu City Hall 004°, 20 km from Mokpo City Hall
3	Elevation/Reference temperature	16 m / 31.5 °C
4	Geoid undulation at the aerodrome elevation	24 m
5	MAG VAR/Annual change	8° W (2020) / 0.094° increasing
6	Aerodrome Operator, Address, Telephone, Telefax, AFS	Korea Airports Corporation(Muan International Airport) 970-260 Gonghang-ro, Mangun-myeon, Muan-gun, Jeollanam-do, 58533, Republic of Korea TEL : +82-61-455-2401~3 Telefax : +82-61-455-2496, 2353 AFS : RKJBZPXZ
7	Type of traffic permitted(IFR/VFR)	IFR/VFR
8	Remarks	NIL

RKJB AD 2.3 OPERATIONAL HOURS

1	Aerodrome Operator	H24
2	Customs and Immigration	HO
3	Health and Sanitation	HO
4	AIS Briefing Office	H24
5	ATS Reporting Office	H24
6	MET Briefing Office	H24
7	ATS	H24
8	Fueling	HO
9	Handling	HO
10	Security	HO
11	De-Icing	HO
12	Remarks	- Take-off and landing is restricted from 1200 UTC to 2300 UTC due to noise abatement(except passenger flights). - CAT D and E ACFT OPR is available under the pre-coordination due to ground handling service facilities. TEL : +82-61-455-2333

RKJB AD 2.4 HANDLING SERVICES AND FACILITIES

1	Cargo handling facilities	Baggage Handling service and trucks
2	Fuel/oil types	Fuel : Aviation Turbine Fuel(Jet A-1) Aviation Gasoline (AV-gas 100LL) Oil : Turbo oil 2 380, 15W50, 5W30
3	Fueling facilities/capacity	Refueling available by trucks Jet A-1 : Elevated storage tank 3 units (total 1 470 000 L, 3 fuel tanks with 390 000 L) Av-gas 100LL : storage tank 1 unit(75 000 L)
4	De-Icing facilities	Available. See AD chart for location.
5	Hanger space for visiting aircraft	NIL
6	Repair facilities for visiting aircraft	NIL
7	Remarks	NIL

Change : Information of aerodrome operator, address, telephone and telefax number.

RKJB AD 2.5 PASSENGER FACILITIES

1	Hotels	Near the AD and in the city(Mokpo & Gwangju)
2	Restaurants	At AD and in the city(Mokpo & Gwangju)
3	Transportation	Buses, Taxis and rental cars available at AD
4	Medical facilities	a. Ambulance service available b. Hospitals in the city(Mokpo & Gwangju)
5	Bank and Post Office	Bank available at AD
6	Tourist Office	Available at AD
7	Remarks	https://www.airport.co.kr/muan/

RKJB AD 2.6 RESCUE AND FIRE FIGHTING SERVICES

1	AD Category for fire fighting	CAT 9
2	Rescue equipment	a. 3 Chemical Fire fighting trucks (Total capacity : 33 000 L water, 4 200 L *AFFF and 750 kg dry chemical) b. 1 Ambulance c. 1 Mobile command vehicle
3	Capability for removal of disabled aircraft	Specialized aircraft recovery equipment available for up to and including B747-400 size aircraft. 100 ton hydraulic recovery jack, 300 ton crane and other accessory equipment can be provided by airlines and agencies. Korea Airports Corporation is the co-ordinator for the removal of disabled aircraft and can be reached at Airport Duty Manager. (TEL : +82-61-455-2331)
4	Remarks	*AFFF: Aqueous Film Forming Foam

RKJB AD 2.7 SEASONAL AVAILABILITY-CLEARING

1	Type of clearing equipment	a. 1 Towed Runway Jet Sweeper b. 2 Compact Runway Jet Sweepers c. 1 Multi purpose Snow Removal Truck d. 1 Snow Blower e. 1 Dump Truck f. 1 Tractor
2	Clearance priorities	a. First 1) RWY 2) TWY(E1, E3, P, A1) 3) Apron taxilanes b. Second 1) TWY(E2, A2) 2) Apron and Other area
3	Remarks	Snow clearance information promulgated by SNOWTAM.

RKJB AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS / POSITION DATA

1	Designation, Surface and strength of aprons	ACFT stands NR. 1 ~ 6, 31 ~ 74 - Surface : Concrete - Strength : PCN 81/R/C/W/T

VOR/DME (8° W/2020)	KWA	114.4 MHz (CH 91X)	H24	350734.2N 1264844.0E	30 m	Unusable and scheduled inspection time : See ENR 4.1 for the details
Schedule inspection time: RADAR(ASR/SSR) : Every 3rd THU 1500 ~ 2000(UTC) of the month						

RKJB AD 2.20 LOCAL AERODROME REGULATIONS

1. Airport regulations
 - 1.1 Pilots are required to monitor VHF 121.5 MHz when flying within Gwangju TMA.
 - 1.2 Pilots should always make sure that microphones are not stuck in the transmitting position before transmission in order to prevent frequency blockage(stuck mike) from impairing ATC.
 - 1.3 Pilot shall use extreme caution during carrying out final approach into RWY 01 or missed approach or departure for RWY 19 due to obstacle located east of extended RWY at approximately 2.1 NM from threshold of RWY 01.
 - 1.4 Pilots should always use caution of military VFR traffic around airport due to many military operation area and military VFR helicopter near Mokpo Navy airfield located approximately 13 NM south of Muan airport.
 - 1.5 Ground engine check procedures
 - a. Aircraft requiring an engine check shall contact Muan GND(121.7 MHz, 317.45 MHz) and provide the following:
 - 1) Call sign or registration number
 - 2) Stand number
 - 3) Type of request, engine start or performance check

Change : Information of ELEV of DME transmitting antenna for MUN VOR/DME.

- b. Engine starts are permitted in the ramp areas. However, the power setting shall not exceed idle thrust unless cleared by ATC.
- c. During the engine check, pilot shall monitor the frequency of Muan GND(121.7 MHz, 317.45 MHz).

1.6 Standard Taxi Procedures

Unless otherwise instructed, aircraft should use the following routes:

- a. Departure
 - 1) RWY 01 in use : Apron - A2 - P - E3
 - 2) RWY 19 in use : Apron - A1 - P - E1
- b. Arrival
 - 1) RWY 01 in use : E2 or E1 - P - A1 - Apron
 - 2) RWY 19 in use : E3 - P - A2 - Apron

1.7 Radio frequency transfer Point

- Arrival
Arrival aircraft shall contact radio frequency from MUAN TOWER(118.25 MHz) to MUAN GROUND(121.7 MHz) when vacating Runway.
- Departure
Departure aircraft shall contact radio frequency MUAN TOWER(118.25 MHz) at the following point unless otherwise instructed by ATC :

Runway in use	Radio frequency transfer point
RWY 01	Passing TWY A2
RWY 19	After passing the intersection of TWY E2, A1 and P

RKJB AD 2.21 NOISE ABATEMENT PROCEDURES

NIL

RKJB AD 2.22 FLIGHT PROCEDURES

1. IFR

1.1 IFR ATC CLEARANCE

The following procedures are established for all turbo jet departures from Muan International Airport:

- a. Aircraft shall contact Clearance Delivery and provide the following information 5 minutes prior to startup or push-back.
 - 1) Aircraft Identification
 - 2) Type of aircraft
 - 3) Destination
 - 4) Proposed flight level or altitude
 - 5) Gate or stand number
 - 6) ATIS code
- b. If aircraft fails to push-back or taxi within 15 minutes after receipt of ATC clearance, pilot should notify ATC except when :
 - 1) Start-up or push-back is delayed due to traffic on the ground, or
 - 2) Aircraft departure is restricted by the release time or the same altitude/route separation.

1.2 SPEED CONTROL

Unless otherwise authorized by ATC, no pilot may operate an aircraft below 10 000 ft AMSL at an IAS of more than 250 kt.

1.3 Fuel Dumping Area

Fuel Dumping Area is established within Gwangju TMA as follows.

- a. Area : A circle, 3 NM radius centered at R 275 MUN/D22
- b. Altitude : 6 000 ft AMSL

1.4 Visual Approach

Visual Approach may be initiated by ATC(Gwangju approach control) or approved upon pilot request on traffic permitting basis when :

- a. Ceiling : at or above 500 ft plus MVA and
- b. Visibility : not less than 5 km
- c. Circuit : West pattern only

- 2. VFR
- 2.1 VFR Procedure
 - a. VFR flight will be permitted under the condition as below :
 - 1) Ground visibility : Not less than 5 km
(If Ground visibility is not reported, Flight visibility : Not less than 5 km)
 - 2) Ceiling : At or above 450 m(1 500 ft)
 - b. VFR Traffic Circuits : Refer to page RKJB AD 2-11
 - c. VFR Traffic Circuits Altitude
 - 1) CAT A, B : 1 300 ft AMSL
 - 2) CAT C, D : 1 800 ft AMSL
 - d. VFR Reporting Points : Refer to page RKJB AD 2-11
- 2.2 Special VFR
 - a. Special VFR Flight for taking off or landing may only be permitted except helicopters, when :
 - 1) The ground visibility is not less than 1 500 m.
 - 2) If ground visibility is not reported at airport, flight visibility is not less than 1 500 m.
 - b. For Special VFR, the pilot shall:
 - 1) Fly only within Control Zone as cleared by ATC.
 - 2) Remain clear of clouds.
 - 3) Maintain at least 1 500 m of flight visibility.
 - 4) Maintain visual reference with surface or water.
 - c. Special VFR may be permitted only between sunrise and sunset unless the pilot has a instrument rating and the aircraft is equipped with the instruments for IFR flight in accordance with requirement specified in an Aviation Act, Republic of Korea.(Except helicopters)
- 3. Radio communication failure procedure
- 3.1 IFR
 - 1. General
 - a. No person may take off unless two-way radio communications can be maintained with the Air Traffic Control.
 - b. On recognition of communication failure during flight, squawk 7600 and if necessary to ensure safe altitude, climb to Minimum Sector Altitude or above to maintain obstacle clearance. Then comply with following procedure.
 - 2. VFR condition

If the failure occurs in VFR conditions, or if VFR conditions are encountered after the failure, each pilot shall continue the flight under VFR and land as soon as practicable.
 - 3. IFR condition

If the failure occurs in IFR conditions, or if paragraph 2 of this section cannot be complied with, each pilot shall continue the flight according to the following:

 - A. DEPARTURE
 - a. Under Pilot Navigation

Runway 01 in use

- RNAV MAKSA 1N, RNAV DOTOL 1N, KWA 3N :

Proceed by the route, altitude/flight level assigned at the last ATC clearance received.

Runway 19 in use

- RNAV MAKSA 1S, RNAV MAKSA 6S, RNAV DOTOL 1S, KWA 3S, IPDAS 3S :

Proceed by the route, altitude/flight level assigned at the last ATC clearance received.

Change : Information of VFR traffic circuits altitude.

b. Under Radar Vectoring

- 1) Proceed by the direct route from the point of radio failure to the fix, route, or airway specified in the vector clearance;
- 2) In the absence of an assigned route, proceed by the route that ATC has advised may be expected in a further clearance; or
- 3) In the absence of an assigned route or a route that ATC has advised may be expected in a further clearance, by the route filed in the flight plan; and
- 4) Maintain minimum enroute altitude(MEA) or the altitude/flight level cleared in the last ATC clearance received, whichever is higher, for 20 minutes; then
- 5) continue the flight with altitude/flight level filed in the flight plan.

B. ARRIVAL

Runway 01 in use

- 1) Proceed to OLBES IAF, OVGEN IAF or PEGRO IAF as advised or instructed by ATC and commence descent and approach as close as possible to the expect further clearance time(EFC) issued by ATC or estimated time of arrival(ETA) filed in the flight plan; and
- 2) Land, if possible, within 30 minutes after ETA or the last acknowledged EFC or ETA, whichever is later.

Runway 19 in use

- 1) Proceed to GUPLA IAF or DOVRA IAF as advised or instructed by ATC and commence descent and approach as close as possible to the expect further clearance time(EFC) issued by ATC or estimated time of arrival(ETA) filed in the flight plan; and
- 2) Land, if possible, within 30 minutes after ETA or the last acknowledged EFC or ETA, whichever is later.

3.2 VFR

A. VFR flight experiencing radio communication failure shall

a. Helicopter

- 1) Squawk 7600, and
- 2) When able to see light gun signal of control tower, follow that instruction.
- 3) If unable to see light gun signal of control tower, hold over " B " until ETA or for 10 minutes, whichever is later, then
- 4) Land parallel taxiway as appropriate.

b. Conventional flight

- 1) Squawk 7600, and
- 2) When able to see light gun signal of control tower, follow that instruction.
- 3) If unable to see light gun signal of control tower, hold over " B " until ETA or for 10 minutes, whichever is later, then
- 4) Make landing on runway 01/19 in use as appropriate.

4. Take-off weather Minima

	19				
Note : SIDs are designed in accordance with STANDARDS for FLIGHT PROCEDURE DESIGN. 1. The TDZ RVR/VIS may be assessed by the pilot. 2. For Night Operations at least REDL or RCLL and RENL are available.					

5. Flight procedure construction criteria

Flight procedures are based on guidance contained in the Fifth edition of ICAO Doc. 8168 - Procedure for air Navigation Services - Aircraft Operations(PANS-OPS).

VFR Traffic Circuits - Muan

* NOTE

1. All VFR flight operation within MUAN control zone shall maintain two way communication with MUAN TWR.
2. Pilots are encouraged to use the recommended VFR traffic circuit for traffic flow, noise abatement, obstacle avoidance. However, helicopter should fly within CAT-A recommended traffic circuit at 700 ft AMSL.
3. The use of the recommended VFR traffic circuit does not alter the responsibility of each pilot to see and avoid other aircraft, obstacle.
4. When conducting a holding at "N" point, pilots are recommended to hold south.
5. All ACFT shall fly over Wind power plant area at or above 1 300 ft AMSL.

VFR Traffic Circuit Altitude

Category	A	B	C	D
Altitude	1 300 ft AMSL		1 800 ft AMSL	

Reporting Point	Goegraphical Name	Position	Coordinates
A	Taeyido(태이도)	R 297 MUN/D8.1	350118.6N 1261344.7E
B	Daesikdo(대식도)	R 245 MUN/D5.2	345549.0N 1261747.0E
C	Mahyeopsan(마협산)	R 120 MUN/D4.4	345702.6N 1262805.2E
D	Gambangsan(감방산)	R 056 MUN/D5.3	350216.4N 1262753.9E
N	Wado(와도)	R 326 MUN/D5.3	350234.0N 1261848.0E

Change : Information of legend for wind turbine.

RKJB AD 2.23 ADDITIONAL INFORMATION

1. Bird concentrations in the vicinity of airport
 The seashore and wetland are situated near Muan International Airport, and the seashore and wetland provide good nesting habitat for both resident birds such as Black-billed Magpie, Ring-necked Pheasant, Rufous Turtle Dove, Tree Sparrow, Mew Gull and migratory birds such as Mallard, Gray Heron, Egret, House Swallow. Mallards inhabit around the airport during winter season, normally October to March. Mallards are active during the morning time and evening time, and they are flying at high altitude. Gray Heron and Egret inhabit during summer season, normally August to September, and they are active during the daytime. Most of resident birds are active during the daytime and fly at low altitude.
 Muan International Airport strives to prevent bird strikes by implementing both non-lethal techniques, gas cannons and playback of distress calls, and lethal techniques, live ammunition shooting, during airport operating hours.
