

RKJY AD 2.1 AERODROME LOCATION INDICATOR AND NAME

RKJY - YEOSU / Domestic

RKJY AD 2.2 AERODROME GEOGRAPHICAL AND ADMINISTRATIVE DATA

| | | |
|---|--|--|
| 1 | ARP coordinates and site at AD | 345032N 1273702E 166° / 1 050 m from THR 17 |
| 2 | Direction and distance from city | 343°, 11 km from Yeosu City Hall |
| 3 | Elevation/Reference temperature | 16 m / 31.9 °C |
| 4 | Geoid undulation at the aerodrome elevation | 27 m |
| 5 | MAG VAR/Annual change | 8° W (2020) / 0.092° increasing |
| 6 | Aerodrome Operator, Address, Telephone, Telefax, AFS | Korea Airports Corporation(Yeosu Airport) 386, Yeosun-ro, Yulchon-myeon, Yeosu-si, Jeollanam-do, 59606 Republic of Korea TEL : +82-61-689-6331, 6339 Telefax : +82-61-689-6330 |
| 7 | Types of traffic permitted(IFR/VFR) | IFR/VFR |
| 8 | Remarks | NIL |

RKJY AD 2.3 OPERATIONAL HOURS

| | | |
|----|-------------------------|---|
| 1 | Aerodrome Operator | 2100-1300 UTC |
| 2 | Customs and Immigration | NIL |
| 3 | Health and Sanitation | NIL |
| 4 | AIS Briefing Office | 2200-1100 UTC |
| 5 | ATS Reporting Office | 2200-1100 UTC |
| 6 | MET Briefing Office | 2200-1100 UTC |
| 7 | ATS | 2200-1100 UTC |
| 8 | Fuelling | NIL |
| 9 | Handling | HO |
| 10 | Security | HO |
| 11 | De-icing | NIL |
| 12 | Remarks | Outside these hours services are available on request. (Only passenger flight) |

RKJY AD 2.4 HANDLING SERVICES AND FACILITIES

| | | |
|---|---|--|
| 1 | Cargo handling facilities | Conveyor belt, various vehicles and equipments |
| 2 | Fuel/oil types | NIL |
| 3 | Fuelling facilities/capacity | NIL |
| 4 | De-icing facilities | NIL |
| 5 | Hanger space for visiting aircraft | NIL |
| 6 | Repair facilities for visiting aircraft | NIL |
| 7 | Remarks | NIL |

Change : Information of operational hours for MET briefing office.

RKJY AD 2.5 PASSENGER FACILITIES

| | | |
|---|----------------------|---|
| 1 | Hotels | In Yeosu & Suncheon city |
| 2 | Restaurants | At AD and in the city |
| 3 | Transportation | Buses, Taxis, Rental cars from AD |
| 4 | Medical facilities | a. Ambulance service available (For 1 patient) b. Hospitals in Yeosu city, 13 km from AD |
| 5 | Bank and Post Office | a. Automated teller machine (ATM) available at AD b. Bank and post office in Yeosu & Suncheon city |
| 6 | Tourist Office | Available at AD |
| 7 | Remarks | http://www.airport.co.kr/mbs/yeosu/ |

RKJY AD 2.6 RESCUE AND FIRE FIGHTING SERVICES

| | | |
|---|---|--|
| 1 | AD Category for fire fighting | Category 7 |
| 2 | Rescue equipment | a. 2 Chemical fire fighting trucks - Water : 23 000 L - AFFF* : 3 000 L - Dry chemical : 500 kg b. 1 Ambulance car c. 1 Mobile command vehicle |
| 3 | Capability for removal of disabled aircraft | Specialized aircraft recovery equipment available for up to and including A321 size aircraft. 100 ton hydraulic recovery jack, 470 ton crane and other accessory equipment can be provided by airlines and agencies. Korea Airports Corporation is the co-ordinator for the removal of disabled aircraft and can be reached at Airport Duty Manager. (TEL : +82-61-689-6331, 6334) |
| 4 | Remarks | * Aqueous Film Forming Foam(AFFF) |

RKJY AD 2.7 SEASONAL AVAILABILITY - CLEARING

| | | |
|---|----------------------------|---|
| 1 | Type of clearing equipment | a. 1 Compact Runway Jet Sweeper b. 1 Dump truck c. 2 Tractors d. 1 Snow Plough e. 1 Urea spreader |
| 2 | Clearance priorities | a. RWY b. TWY c. Apron and other area |
| 3 | Remarks | Snow clearance information promulgated by SNOWTAM |

RKJY AD 2.8 APRONS, TAXIWAYS AND CHECK LOCATIONS/POSITIONS DATA

| | | |
|---|--|--|
| 1 | Designation, Apron surface and strength | a. Surface : Concrete, Asphalt b. Strength : Apron1 Concrete PCN 70/R/C/W/T Apron2 Asphalt PCN 67/F/C/X/T Apron3 Asphalt PCN 67/F/C/X/T |
| 2 | Designation, Taxiway width, surface and strength | a. Width - A, B, C, P : 23 m - G : 15 m b. Surface : Asphalt, Concrete c. Strength - A, B, P(BTN A and stand NR. 4 behind) : Asphalt, PCN 67/F/C/X/T - C, P(BTN B and C) : Asphalt, PCN 67/F/C/X/T - P(stand NR. 3 behind and BTN B) : Concrete, PCN 70/R/C/W/T - G : PCN 24/F/B/X/T |
| 3 | Altimeter check location and elevation | Location : At apron Elevation : 19 m |
| 4 | VOR checkpoints | VOR : NIL |
| 5 | INS check points | INS : Refer to Aircraft Parking/Docking Chart |
| 6 | Remarks | NIL |

RKJY AD 2.9 SURFACE MOVEMENT GUIDANCE AND CONTROL SYSTEM AND MARKINGS

| | | |
|---|---|---|
| 1 | Use of aircraft stand ID signs, TWY guide lines and visual docking/parking guidance system of aircraft stands | a. Taxi Guide lines at apron b. Nose-in guidance at aircraft stands |
| 2 | RWY and TWY markings and LGT | a. RWY 17/35 : Designation, CL, THR edge, TDZ and aiming point marking, and edge, CL and RWY 17 TDZ LGT b. TWY : CL, edge marking and edge LGT |
| 3 | Stop bars | NIL |
| 4 | Remark | NIL |

Change : Information of strength for apron 3.

RKJY AD 2.10 AERODROME OBSTACLES

RKJY AD 2.20 LOCAL AERODROME REGULATIONS

1. Ground engine check procedures
 - 1.1 Aircraft requiring an engine check shall contact YEOSU TWR and provide the following;
 - a. Call sign or registration number
 - b. Stand number
 - c. Type of request, engine start or performance check
 - 1.2 Engine starts are permitted in the ramp areas. However, the power setting shall not exceed idle thrust.
 - 1.3 During the engine check, any pilot shall monitor the frequency of YEOSU TWR.
2. All aircraft contact YEOSU TWR prior to entering class D airspace. (Refer to RKJY Visual approach Chart)

Change : Information of remarks for LOC 17, coordinates for DME 17 and DME 35.

RKJY AD 2.21 NOISE ABATEMENT PROCEDURES

1. Aircraft Operating Procedures(Except helicopter)

1.1 Take off

1.1.1 NADP 1(RWY 17)

All departing aircraft should apply ICAO PANS-OPS(Doc. 8168) Volume III Noise Abatement Departure Procedures One (NADP ONE).

- a. Take-off to 1 100 ft AGL
 - Take-off power.
 - Take-off flaps/slats setting.
 - Initial climb speed is not less than $V_2 + 10$ kt.
- b. At 1 100 ft AGL
 - Reduce power/thrust to Not less than climb power.
- c. 1 100 ft AGL to 3 000 ft AGL
 - Maintain with flaps/slats in the take-off configuration.
 - Climb at $V_2 + 10$ to 20 kt.
- d. After passing an altitude of Not less than 3 000 ft AGL
 - Accelerate and retract flaps on schedule to En-route climb.

1.2 Approach

For noise abatement using a reduced flap setting landing procedure is recommended. However, use of this procedure is subject to captain's decision and safety prevail at all times.

1.2.1 Delayed Flap setting Approach

- a. for approach to land on RWY 17;
 - maintain intermediate flap setting until 1 NM prior to FAF.
 - set final landing flaps within 1 NM prior to FAF.
- b. for approach to land onto RWY 35;
 - maintain intermediate flap setting until 1 NM prior to FAF.
 - set final landing flaps within 1 NM prior to FAF.

1.2.2 Reduced Flap setting Approach

- a. When the landing weight and runway length are enough,
- b. When the runway condition is dry,
- c. When the tailwind component is not existent,
- d. Set the certificated shallow landing flaps in the approved performance section of the Airplane Flight manual to land.

1.2.3 Continuous Descent Approach

While making ILS RWY 17 approach, all aircraft are recommended to conduct the Continuous Descent Approach as published on appropriate approach chart.

1.3 Exempted cases

1.3.1 Aircraft need not be complied with the procedures described in paragraph 1.1 and 1.2 above in adverse operating conditions such as;

- a. If the runway is not clear and dry. i.e. it is adversely affected by, snow, slush, ice, water or other substances;
- b. In conditions when the ceiling is lower than 500 ft, or when the horizontal visibility is less than 1.9 km.
- c. When the cross-wind component, including gusts, exceeds 15 kt.
- d. When the tailwind component, including gusts, exceeds 5 kt.
- e. When the wind shear has been reported or forecast, or thunderstorms are expected to affect the approach.

Change : Information of ICAO PANS-OPS(Volume I → Volume III).

1.3.2 Aircraft unable to comply with the procedures described in paragraph 1.1 and 1.2 above for any reason shall inform ATC.

1.4 Operational Limitations

1.4.1 Engine test shall be conducted with prior permission from the airport control tower. It shall be conducted at the approved place and approved conditions only. However, the power setting(s) shall not exceed idle thrust.

RKJY AD 2.22 FLIGHT PROCEDURES

1. IFR Procedure

1.1 Take-off Weather Minimum

| CATEGORY | RWY | Facilities | | | |
|--|-----|------------------|------------------|------------------|------------------|
| | | REDL & RCLL | REDL & RCL | REDL or RCL | NIL (Day Only) |
| Multi-Engine ACFT with TKOF ALTN AD | 17 | 400 m / 1 200 ft | 400 m / 1 200 ft | 400 m / 1 200 ft | 500 m / 1 600 ft |
| | 35 | 400 m / 1 200 ft | 400 m / 1 200 ft | 400 m / 1 200 ft | 500 m / 1 600 ft |
| OTHERS | 17 | AVBL LDG MINIMA | | | |
| | 35 | | | | |
| Note : SIDs are designed in accordance with STANDARDS for FLIGHT PROCEDURE DESIGN. | | | | | |
| 1. The TDZ RVR/VIS may be assessed by the pilot. | | | | | |
| 2. For Night Operations at least REDL or RCLL and RENL are available . | | | | | |

1.2 Fuel Dumping Area

Fuel Dumping Area is established within SACHEON TMA as follows;

1. Area : Circle with radius of 5 NM centered on R 222 YSU/D10
2. Altitude : At or Above 6 000 ft AMSL

1.3 Visual Approach

Visual approach may be initiated by ATC or approved upon pilot's request on traffic permitting basis at;

1. Ceiling : At or above 500 ft plus MVA (MVA of YEOSU CTR : 4 000 ft)
2. Visibility : Not less than 5 km (3 SM)

2. VFR

2.1 VFR Procedures

1. VFR Weather Minimum

VFR flight will be permitted under the condition as below;

- a. Ground Visibility : Not less than 5 km (3 SM)
(If Ground Visibility is not reported, flight Visibility should be no less than 5 km.)
- b. Ceiling : At or above 450 m (1 500 ft)

2. VFR Traffic Circuit : Refer to page RKJY AD 2-14.

3. VFR Traffic Circuit Altitude

- a. CAT A, B, C : 1 300 ft
- b. Helicopter : 800 ft

4. VFR Reporting Points : Refer to page RKJY AD 2-14.

5. VFR Flight Procedure

a. Departure procedure

1) After departing from RWY 17, fly the following routes unless otherwise directed by ATC;

- For north bound : Turn right then proceed to B or turn left then proceed to E via C
- For west or south bound : Turn right then proceed to B
- For east bound : Turn left then proceed to C

2) After departing from RWY 35, fly the following routes unless otherwise directed by ATC;

- For north bound : Turn left then proceed to A or turn right then proceed to D
- For west or south bound : Turn left then proceed to A
- For east bound : Turn right then proceed to D

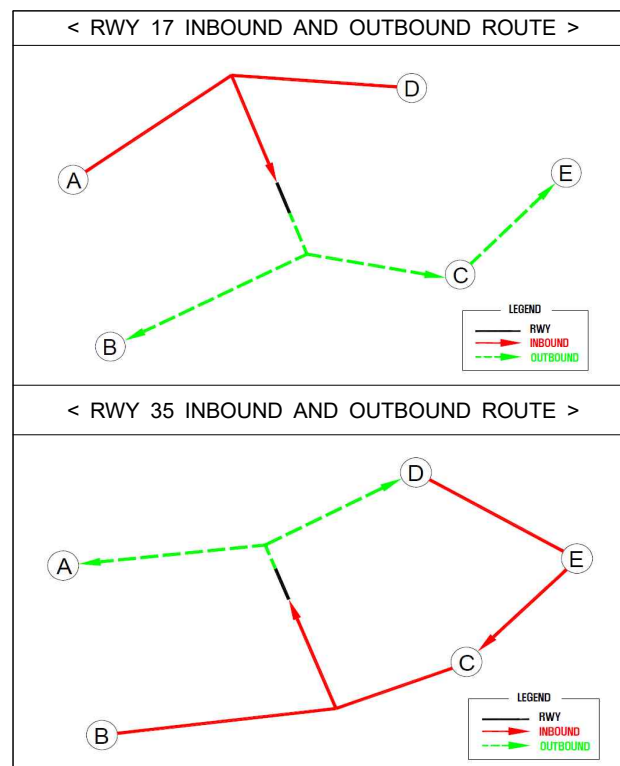

b. Arrival procedure

1) When RWY 17 in use, fly the following routes unless otherwise directed by ATC;

- Inbound from north : Proceed to A or proceed to D, then make long distance(4 NM) straight-in approach and land.
- Inbound from west or south : Proceed to A, then make long distance (4 NM) straight-in approach and land.
- Inbound from east : Proceed to D, then make long distance(4 NM) straight-in approach and land.

2) When RWY 35 in use, fly the following routes unless otherwise directed by ATC;

- Inbound from north : Proceed to B or proceed to C via D and E, then make long distance(4 NM) straight-in approach and land.
- Inbound from west or south : Proceed to B, then make long distance(4 NM) straight-in approach and land.
- Inbound from east : Proceed to C, then make long distance(4 NM) straight-in approach and land.

Change : Information of VFR flight procedure.

2.2 Special VFR

1. Special VFR flight may be permitted when

- a. ground visibility is not less than 1 500 M (Take-off and Landing); and
- b. if ground visibility is not reported at airport, flight visibility is not less than 1 500 M (transition).

2. For Special VFR, the pilot shall

- a. fly only within control zone as cleared by YEOSU TWR;
- b. remain clear of clouds;
- c. maintain at least 1 500 M of flight visibility; and
- d. maintain visual reference with surface or water.
- e. A pilot who is not qualified for instrument flight or not flying an aircraft not equipped with flight instruments for IFR flights prescribed in the Aviation Act shall only fly during daytime. However helicopter may be permitted to fly during night time.

3. Special-VFR flights may be permitted only between sunrise and sunset unless the pilot has instrument rating and the aircraft is equipped for IFR flight in accordance with the requirements specified in the Aviation Act of the Republic of Korea.

3. RADIO COMMUNICATION FAILURE PROCEDURE

3.1 IFR

1. General

- a. No person may take off unless two-way radio communications can be maintained with the Air Traffic Control.
- b. On recognition of communication failure during flight, squawk 7600 and if necessary to ensure safe altitude, climb to Minimum Safe Altitude or above to maintain obstacle clearance. Then comply with following procedure.

2. VFR condition

If the failure occurs in VFR conditions, or if VFR conditions are encountered after the failure, each pilot shall continue the flight under VFR and land as soon as practicable.

3. IFR condition

If the failure occurs in IFR conditions, or if paragraph 2 of this section cannot be complied with, each pilot shall continue the flight according to the following :

A. DEPARTURE

- a. Proceed by the route, altitude/flight level assigned at the last ATC clearance received.
- b. The time the last assigned route and altitude is reached ;
whichever is later and thereafter adjust route and altitude in accordance with the filed flight plan.
- c. Under Radar vectoring
 - 1) Proceed by the direct route from the point of radio failure to the fix, route, or airway specified in the vector clearance;
 - 2) In the absence of an assigned route, proceed by the route that ATC has advised may be expected in a further clearance; or
 - 3) In the absence of an assigned route or a route that ATC has advised may be expected in a further clearance, proceed by the route filed in the flight plan; and
 - 4) Maintain minimum enroute altitude(MEA) or the altitude/flight level cleared in the last ATC clearance received, whichever is higher, for 5 minutes
 - 5) Continue the flight with altitude/flight level filed in the flight plan.

B. ARRIVAL

Runway 17 in use

- Proceed to YEONA IAF or SKOTA IAF and commence descent and approach as close as possible to the expect further clearance(EFC) issued by ATC or estimated time of arrival(ETA) filed in the flight plan; and
- Land, if possible, within 30 minutes after ETA or the last acknowledged EFC or ETA, whichever is later.

Runway 35 in use

- Proceed to SOONA IAF and commence descent and approach as close as possible to the expect further clearance time(EFC) issued by ATC or estimated time of arrival(ETA) filed in the flight plan; and
- Land, if possible, within 30 minutes after ETA or the last acknowledged EFC or ETA, whichever is later.

3.2 VFR

VFR flight which has experienced radio communication failure shall

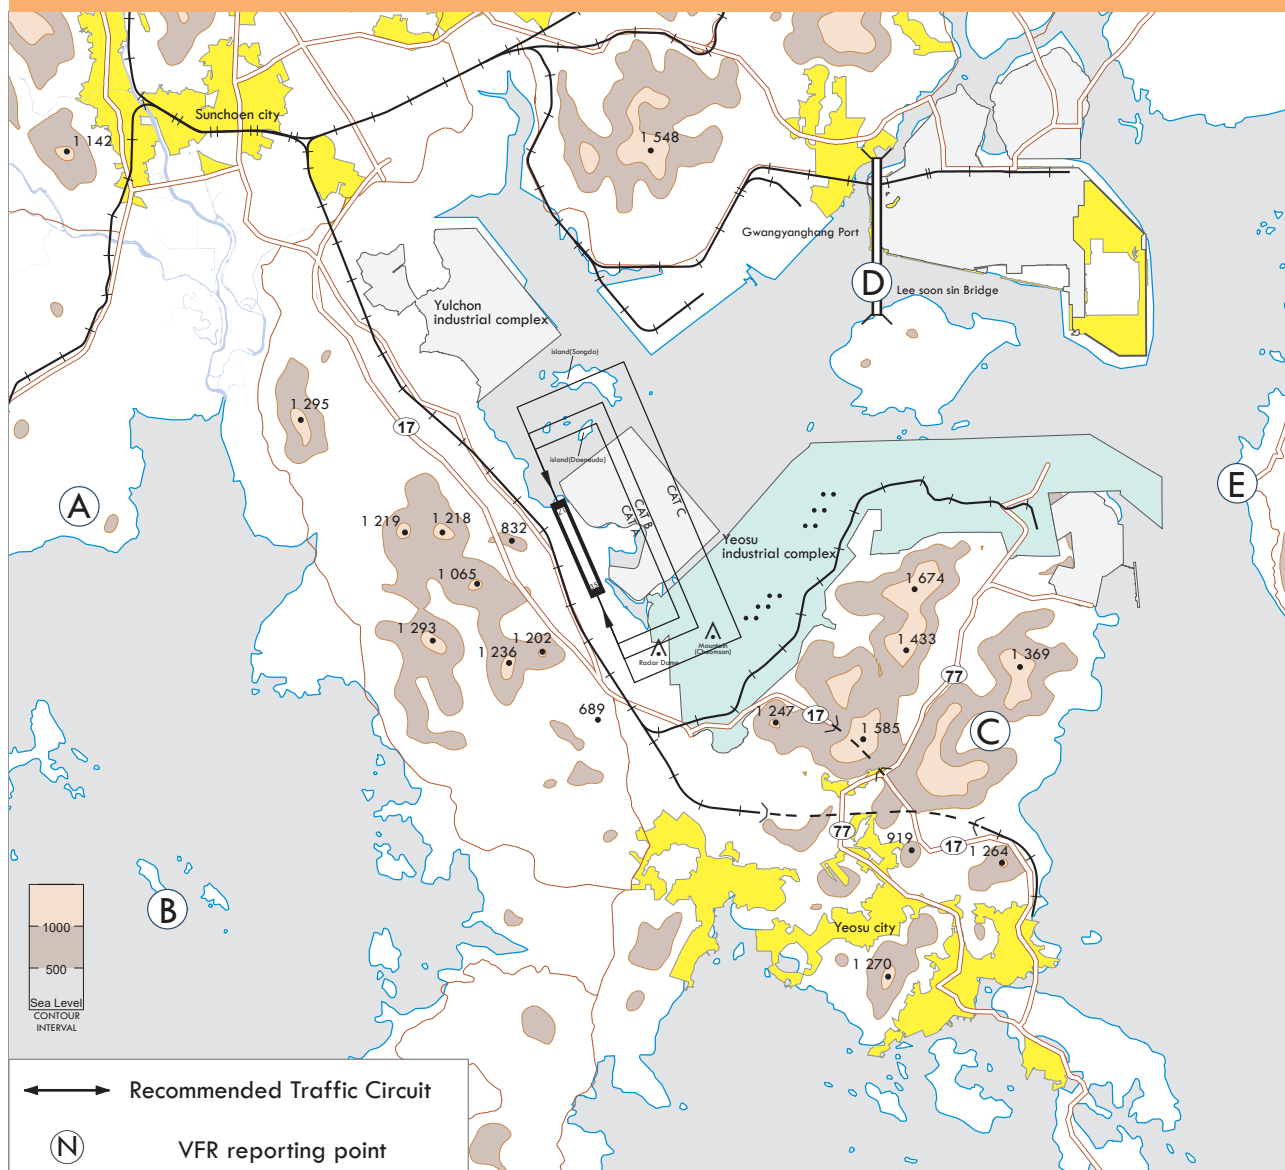

1. Helicopter

- a. Squawk 7600, and
- b. When able to see light gun signal of control tower, follow that instruction
- c. If unable to see light gun signal of control tower, hold over downwind until ETA or for 10 minutes, whichever is longer, then
- d. Land on runway in use or STAND NO 5 as appropriate and as filed,
- e. Pilot shall use caution traffic landing and take-off from/to runways.

2. Conventional flight

- a. Squawk 7600, and
- b. When able to see light gun signal of control tower, follow that instruction
- c. If unable to see light gun signal of control tower, hold on downwind until ETA or for 10 minutes, whichever is longer, then
- d. Aircraft on east pattern should land on runway 17/35
- e. Pilot shall use caution traffic landing and takeoff from/to runways.

VFR Traffic Circuits - Yeosu

* NOTE

1. All VFR flight operation within YEOSU control zone shall maintain two way communication with YEOSU TWR.
2. Pilots are encouraged to use the recommended VFR traffic circuit for traffic flow, noise abatement, obstacle avoidance. However, helicopter should fly within 0.7 NM from RWY at 800 ft AMSL.
3. The use of the recommended VFR traffic circuit does not alter the responsibility of each pilot to see and avoid other aircraft, obstacle.

VFR Traffic Circuit Altitude

| Category | A | B | C | D |
|----------|---------------|---|---|-----|
| Altitude | 1 300 ft AMSL | | | N/A |

| Reporting Point | Goographical Name | Position | Coordinates |
|-----------------|---|----------------|------------------|
| A | Bonghwa Mountain (봉화산) | R 283 YSU/D7.1 | 345112N 1272829E |
| B | Yejado Island (여지도) | R 236 YSU/D7.8 | 344526N 1272958E |
| C | Korea Coast Guard Academy (해양경찰 교육원) | R 122 YSU/D6.4 | 344751N 1274413E |
| D | Lee soon sin Bridge (이순신대교) | R 056 YSU/D5.6 | 345418N 1274218E |
| E | YeomHae BreakWater (염해 방파제) | R 093 YSU/D9.4 | 345120N 1274834E |

Change : Page control.

RKJY AD 2.23 ADDITIONAL INFORMATION

1. Bird concentrations in the vicinity of airport

There are mountains and sea near the Yeosu Airport. So vicinity of the airport has some resting and feeding areas of birds.

- a. There is no specific tendency of migratory bird's habitat and migration route around the airport. Appearance of swallows from April to September, however, should get an attention. Also, in the rainy season, a flock of egrets appears both inside and outside of the airport.
- b. Meanwhile, sedentary birds such as sparrow, magpie, and dove often appear both inside and outside of the airport including runways. They move from the feeding area(500 m south of the airport) to the airport.
- c. In order to reduce the wildlife hazard in the vicinity of runway, wildlife control activities include distress call (Gas Cannon and AV-Alarm) and capture of harmfulness birds using shotgun.

2. Yeosu and Yulchon industrial complexes

Yeosu and Yulchon industrial complexes are located near the Yeosu Airport. So it is recommended to follow the VFR traffic circuit and altitude when flying by.

- a. Yeosu industrial complex includes a facility for storage of liquid petroleum products or petrochemicals. Pilots should pay special attention when approaching RWY 35.
- b. Yulchon industrial complex is composed of steel making and electrical power industry.
